PEER-REVIEWED PUBLICATIONS

Note: Like many other branches of Computer Science, conferences are usually more prestigious and competitive venues than the journals in HCI and related subfields. These conferences are double-blinded peer-reviewed, archived, well-referenced, and extremely selective. Some of the top conferences on HCI, critical computing, climate change, environmental sustainability, and data practices include CHI, CSCW, ACM FaccT (previously FAT*), DIS, and ACM COMPASS. [See Google Ranking for HCI venues].
